

Global Engineering Management and Support, Inc. (GEMS)

Appoints Stephen Fairbanks as its Vice President Business Development

FLORIDA--Nov. 5th, 2009--Global Engineering Management and Support, Inc (GEMS) announced today that Stephen Fairbanks has been appointed Vice President of Business Development and Associate Partner, effective October 12, 2009. He will also serve as Applications Engineering Manager.

Mr. Fairbanks has spent his entire career providing Engineering and Marketing expertise in the ATE industry. He most recently served as Regional Account Manager at Teradyne Inc. prior to joining the team at GEMS. At Teradyne, he was responsible for product line development as well as global account management.

“Steve Fairbank's broad-based experience in global marketing, governance and strategy make him an outstanding addition to our team,” said Eva Kohfeldt, GEMS’s chairman, president and chief executive officer. Mr. Fairbanks will contribute to the enhancement of the company's technology product base.

A graduate of Central New England College, Mr. Fairbanks also attended Worcester Polytechnic Institute for post graduate studies. Among other affiliations, Mr. Fairbanks serves as Board Vice President for a local not-for-profit organization and has served on many industry standards committees including those of the IEEE and ASTE. Steve and his family currently live in Worcester Massachusetts.

GEMS is a leading provider of high technology products related to Automatic Test Equipment/ Hardware and Test Program Sets/Software to the Mil-Aero and Space Sectors. GEMS is headquartered in Melbourne Florida and develops software tools, equipment, and test software used to verify the performance of electronic components, circuit cards, and sub-assemblies. Current contracts include test development projects for commercial and military satellites, industrial automation and control systems, weapons systems, guidance systems, targeting systems, and various other types of equipment.
